

AI-Powered Traffic Intelligence for Safer Communities

Real-time computer vision and analytics deployed at your intersections — 24/7 monitoring, zero manual effort. Purpose-built to accelerate your city's Vision Zero goals with actionable, data-driven safety intelligence.

PLATFORM CAPABILITIES

Near real-time processing | Advanced image pre-processing | 24/7 monitoring

01 Vehicle Detection & Classification

Classify vehicles by type in real time across every monitored intersection.

02 Speed Monitoring

Continuous speed tracking with threshold alerts for speeding and unsafe behavior.

03 Near-Miss Analytics

Detect and quantify near-miss events to establish risk zones before crashes happen.

04 Risk Heat Maps

Time-based risk visualization to identify danger zones by hour, day, and season.

05 Pedestrian Yielding Analytics

Monitor driver yielding behavior at crosswalks to protect vulnerable road users.

06 Crash Detection & 911 Response

Automatic collision detection with instant 911 notification for faster emergency response.

07 Traffic Signal Preemption

Intelligent signal control data to prioritize emergency vehicles and optimize flow.

08 Daily & Weekly Reports

Automated reporting dashboards delivered to your team with key safety metrics.

09 Before / After Studies

Measure intervention impact with data-backed before/after comparative analysis.

Accelerating Your Vision Zero Strategy

Every capability feeds directly into Vision Zero reporting frameworks. Our platform automates data collection, analysis, and reporting to track progress toward eliminating traffic fatalities — turning intersection data into policy-ready insights.

24/7 Continuous Monitoring

100% Automated Reporting

WHY IRIS MOBILITY

Zero Upfront Cost

Free pilot deployment at key intersections

Non-Punitive Model

Education & awareness — not fines or enforcement

Turnkey Deployment

We install, configure, and maintain everything

Vision Zero Ready

All reports auto-compiled for VZ compliance

Partner With Us: No-Cost Pilot Program

We deploy AI camera systems at 1–2 key intersections in your city at zero cost. Within weeks, you'll have real violation data, risk heat maps, and a clear safety picture — no fines, no penalties, just actionable insights. Pilot results integrate directly into your Vision Zero action plan and grant applications.
